Compact Vapor Generator Iron

<b>Model</b>	V100
<b>Electrical</b>	110V
<b>Water capacity</b>	1.8 cups - 430ml
<b>Wattage</b>	1800W
<b>Elements</b>	2
<b>Steam pressure</b>	15 g/min. or 30g/min.
<b>Continuous steam</b>	Yes
<b>Eco-Intelligent™</b>	Yes
<b>Steam Ready™</b>	Yes
<b>Automatic shutoff</b>	Yes
<b>Soleplate</b>	Stainless steel
<b>Demineralizer</b>	Yes
<b>Power consumption</b>	15 amps
<b>Cord length</b>	8.2'
<b>Electrical approval</b>	cETLus
<b>Weight</b>	4 Lbs (1.81 kg)

## DESCRIPTION

The new Digital Velocity V100 is the most advanced stand alone iron in the world. You can now enjoy professional ironing quality and speed with the simplicity of using a traditional iron. With a revolutionary and patented technology, the V100 incorporates an internal heating element and pump system that produces more steam continuously (up to 30g/min) than conventional irons. This guarantees a professional finish to your garments.

## DIGITAL ACCURACY

No iron gives you more accurate control of the temperature than the V100. When selecting your fabric temperature setting, the digital thermostat controls the temperature with far greater accuracy than conventional non-digital irons.

## WOOLMARK APPROVED

The Digital Velocity doesn't produce steam at the soleplate like traditional irons, but generates it inside, in a pre-heating chamber. With this advanced technology, there is no need to have a higher temperature in order to prevent water spitting. It works so well in fact, that our V100 bears the Woolmark Approved symbol confirming its safe use on delicate wool fabrics.

## ACOUSTIC WARNING DEVICE

In addition, the Digital Velocity has an acoustic warning device that beeps when the desired temperature is reached, when the auto shut-off safety system is activated and each time you press a selection button.

## ECO-INTELLIGENT™ FEATURE

To save energy and water, the unique Eco-Intelligent™ system will stop the iron from steaming after 3 seconds of not detecting movement. Ready to iron again? Simply pick up the iron and begin pressing. There is no need to touch a button for steam.

## STEAM READY™ FEATURE

Much loved by sewers and ironing enthusiasts, Steam Ready™ allows the user to iron continuously without the auto shut-off feature. When activated, the iron will not shut off, unless manually turned off by the user.
